

VCS FOUNDATION PRESENTS AN INTEGRATED SOLUTION TO SUPPORT CERVICAL CANCER ELIMINATION FOR ALL

VCS Foundation is a not for profit organization established in 1964 with the goal of achieving cervical cancer control in Australia. We believe that cervical cancer elimination should be for all, no matter where you live.

Our three operational pillars; VCS Population Health, VCS Pathology and VCS Digital Health are an integrated solution to assist you in the design and delivery of screening and vaccination strategies to support cervical cancer prevention for all.

We work locally, regionally and internationally. We understand the complexities of population health and the importance of delivering services to improve the health of communities in ways that are safe, acceptable and cost effective.

We work effectively in collaboration with stakeholders and in partnerships.

VCS Population Health provides public health operations and advice to support the delivery of screening and vaccination services. We established Australia's first cervical screening registry over 25 years ago and our team of public health practitioners and health information managers know how to design and deliver high quality registry operations. High quality integrated data flows provide the information that you and every person involved in the delivery of your program need to support participants and optimize its reach and results. As well as delivering excellence in operational public health practice, we also excel in policy-relevant research design and delivery to ensure that programs continually improve and progress.

VCS Pathology is our specialist clinical laboratory providing excellence in HPV testing, cervical cytology, histopathology and testing for sexually transmissible infections. We are leaders in self-collected HPV tests, pioneering a service supporting self-collection for cervical screening. In our 50 years of operation we have reported over 12 million cervical screening tests. Our Medical Education Unit develops and delivers accredited training and education materials to support medical professionals to conduct high quality screening in practice settings. As a not for profit reference laboratory service, we can consult with you about all aspects of quality testing supporting screening to the highest standards.

VCS Digital Health has over 25 years of successful service delivery in developing, operating and supporting highly scalable, configurable and secure digital platforms and eHealth solutions.

The Collaboration
Award

CanSCREEN® is an award winning contemporary technology platform that has been designed to securely support population health management services across a spectrum of health programs, including screening and vaccination. We work with you to support your large and small scale health service program requirements, and to cost effectively improve health outcomes.

Project ROSE, highlighted elsewhere in this issue, is an example of our ability to innovate and adapt to different settings to achieve health for all.

VCS Foundation is proud to be a key partner of Australia's National Health and Medical Research Council (NHMRC) funded Centre of Research Excellence (CRE) in Cervical Cancer Control. The work of the Centre for Research Excellence in Cervical Cancer Control will ensure the future of cervical cancer prevention is underpinned by world class research.

The Compass Trial, is a large scale randomized controlled trial, being conducted by VCS Foundation and Cancer Council NSW. This significant study is important for Australia's National Cervical Screening Program and globally for understanding the implementation and impact of HPV based screening.

Australia is a world leader in achieving cervical cancer control in our population and it is time to extend that leadership to supporting cancer prevention globally.

The unique combination of our integrated services can cost effectively support you in responding to the global call to action to eliminate cervical cancer.

We invite you to join us in a new partnership to save more lives.
